Next to a Team Roping event, tap the **Add Entry** button and then tap the **Role** button to select your Role as a Header or Heeler.

Note: If you have not set your Roping Classifications in your personal Profile you will be required to set them now (see [Add Roping Classifications](#) on page 10).

If the organization has set optional Pick entries, you may add by tapping the + **Add Entry**.

Viewing Draw Entries and Ghost Entries

Some Team Roping Competition Events may use Draw Entries and/or Ghost Entries. A **Draw Entry** is an entry where the roping partner is not chosen at the time of entry and will be drawn as per the organization/competition rules such as a random draw of available partners. These team partners will be identifiable when viewing the draw with a small red square icon with the letter D. It will appear as shown:

A **Ghost Entry** is an entry where the roping partner is not chosen at the time of entry and will be drawn as per the organization / competition rules such as a random draw of available partners, but the partner does not pay fees and is not eligible for points and monetary payouts.

After a team roping draw has been published, ghost team roping partners are shown with a small ghost shaped icon.

Competitions

Draw Preferences and Draw Groups

[View on YouTube](#)

Some organizations produce competitions with multiple performances and limits on the number of competitors that may compete in each performance.

The competitor may choose to select their performance preferences. That is, the competitor selects their first choice and subsequent choices for which performance they wish to be drawn into, within the competition.

When the organization runs the draw, the Draw Generation Engine will attempt to place competitors in the draw according to their preferences. If they are not drawn into their first preference, the raw Generating Engine will attempt to draw them into their second preference. If they are not successfully drawn into a performance, they will be *drawn out*, and not included in the competition.

The process includes the following steps:

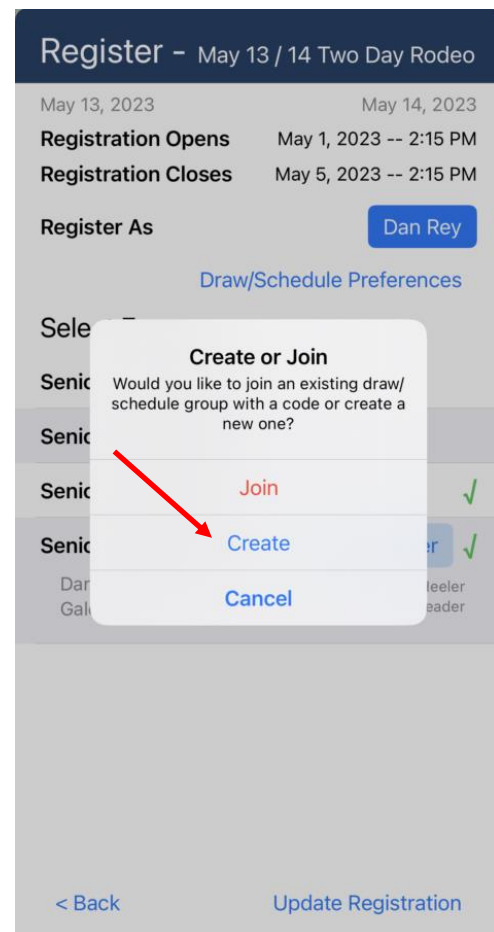

1. Enter your Competitions.
2. Complete the payment for your events.
3. Enter or share any team codes.
4. Set your Draw/Schedule Preferences.

To set draw preferences and draw groups:

1. Tap the **Draw/Schedule Preferences** button.
2. Normally the first competitor of a group will be selected to create the group by tapping the **Create** button.

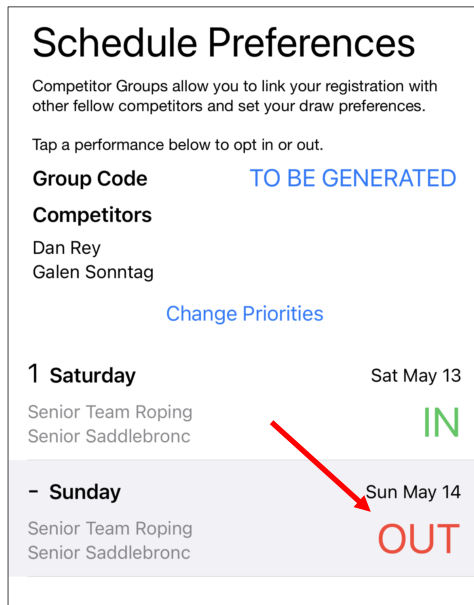

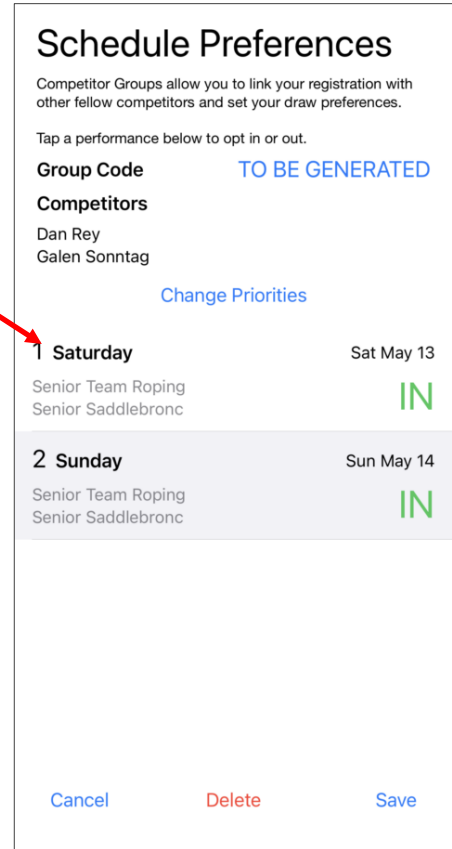

If you are not part of a buddy group/entry group, you should still tap on **Draw/Schedule Preferences** to set your preferences.

You will be a group of one and you do not need to share the group code with anyone.

The Schedule Preferences appears with all performances shown.

Your performance preferences will default to the order of the performances in the competition. You can indicate that you do NOT want to be drawn into a performance by tapping **IN** which will change it to an **OUT**.

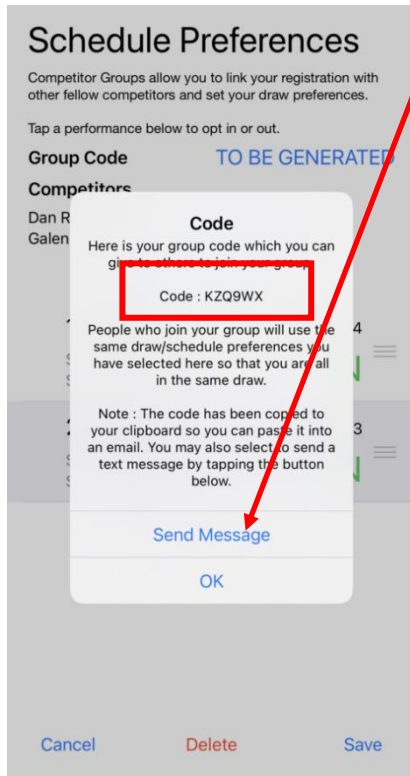

- You may also change the performance preferences order by tapping **Change Priorities**, select a performance by holding on the three grey bars, and drag it up or down to change the order. Below we have moved Sunday to be the first preference.

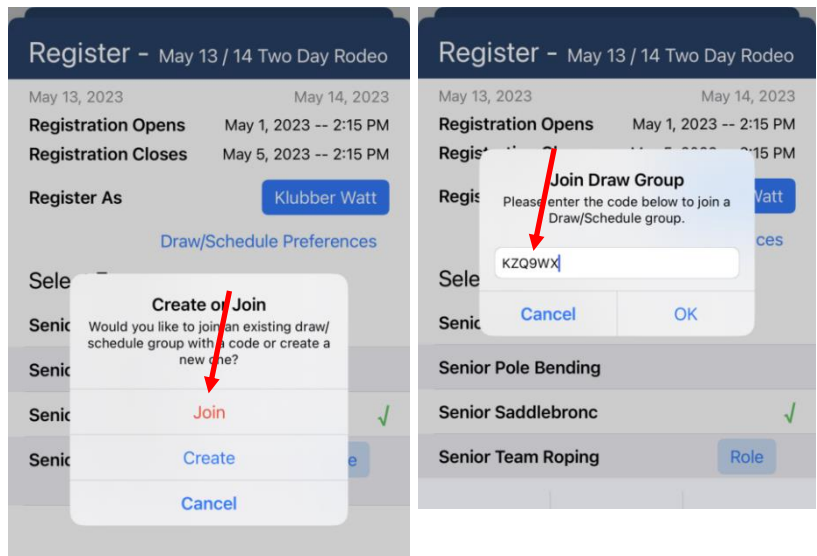

4. Tap **Save** when you are finished making your selections and the group code will be shown and automatically copied to your clipboard.
5. Send this to other members of your group.

IMPORTANT: When you create a group code, any team members of team events will automatically be joined to your group. When another member of your group completes their Competition registration, they should then tap Draw/Schedule Preferences and tap the Join button, then paste the group code.

What other group members see when registering:

Competitions

They will now be included in the list of group members and will have the same Draw Preferences as you and other members of the group.

Carryover To Be From One Event to Open

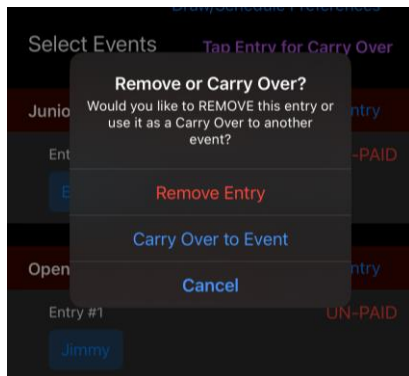

The organization may set the Competition to allow **Carryover to be From one event**, such as the Junior Event, to the Open Event.

The organization may set the competition to allow **Carryover from the Open event** to other events.

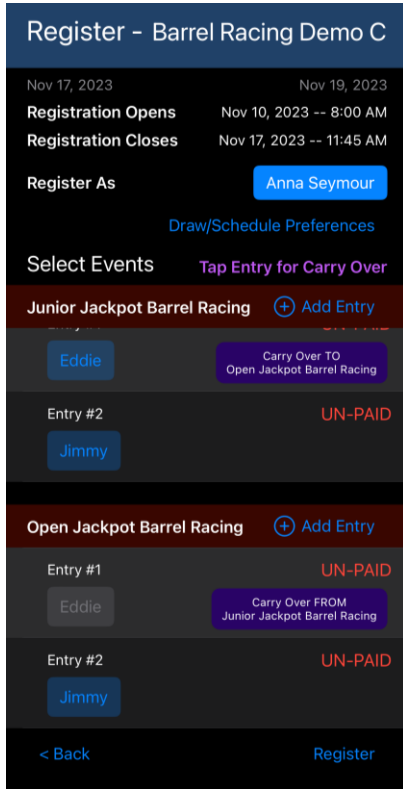

If you are using the Carryover **From the Open to another event**, do the following:

1. Select that event to Carryover to.

Competitions

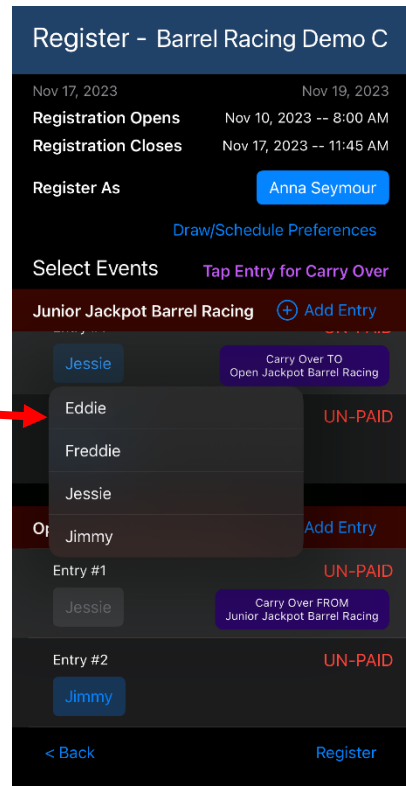

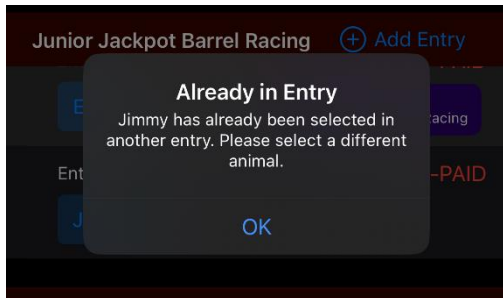

You are not required to carry over any of your entries, and you can use a combination of carryover and event entries up to a maximum number of entries allowed (as set by the organization).

Rider – Horse

The rider - horse combination is considered in the registration process. If you change a horse for one of the entries, it will also change for the Carryover entry.

If the organization requires that all rider - horse combinations entered in an event are unique, you receive a message that the entry, or the horse change, is not allowed:
